

Debug me, I'm famous!

This is an HTML / CSS / Bootstrap exercise made for the Montreuil - Promo 5.

Try to fix the `bad.xhtml` file, the solution is the `good.html` file.

You will also need the `carousel.css` file, and the purpose is of course to customize the obtained template.

This gist show diffs between the two files: <https://gist.github.com/yvan-sraka/3388cd39e6207e8ce523/revisions>
